

Eco- Sleeve

The Environmentally Friendly Sleeve

Most managers know that if a washroom has a persistent malodour visitors/staff perceive it as dirty and smelly. Therefore finding and eradicating the source of the malodours is essential. These malodours are usually the result of the partial degradation of urine and other body fluids by bacteria in the environment. These bacteria see urine as a food source – as the bacteria grow, so does the smell.

Urine results in the build up of uric salts which if left untreated forms uric scale which is insoluble in water and is difficult to remove. When uric scale is combined with limescale you have the potential for both smells and blockages. Many companies have installed water reducing systems without using biological assistors to break down the uric salts.

However with insufficient water flowing through the pipes the build up of uric scale and sludge, will become inevitable.

Extract from “why do we need enzymes”

“Enzymes actually out-perform Germicidal Cleaners because they digest the host material where the germs and odour causing bacteria live and reproduce. Germicides will kill germs and odour causing bacteria but because they do not eliminate the host organic material, new bacteria can and will begin to reproduce very soon after the germicidal has been applied.”

Let our “new” Eco-Sleeve transform your washroom;

Environmental Benefits;

- Up to 90% Reduction on Water Usage
We supply water management units and/or flow restricting valves if your system has no water management or restrictor valves already in place.
- Eliminate/Reduce blockages
- This sleeve is truly recyclable

Remove sleeve from urinal

Clean urinal and sleeve

Insert new biological cartridge (screw top)

Refit to urinal

Cost Savings;

- Reduction in water charges
- Reduction in maintenance charges ie. Blockages in pipework/drains:

How much does it cost?? Year 1 - £49.50 (includes sleeve, urinal fitting and 12 cartridges)
Year 2 - £24.00 (pack of 12 Cartridges)
Replacement sleeve with 12 Cartridges £44.95
